DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the method of processing samples for delay locked loop processing, comprising interpolating between received samples to generate time shifted samples; extracting ontime control symbol samples from one of the received samples and the time shifted samples; extracting first non-ontime control symbol samples from one of the received samples and the time shifted samples; and subsequently extracting second non-ontime symbol samples based on the first non-ontime control symbol samples and the ontime control symbol samples, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Application/Control Number: 10/033,513

Art Unit: 2631

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because:

- a) The recitation "CDMA" in line 1 of the abstract is suggested to be changed to "Code Division Multiple Access (CDMA)"
- b) The recitation "DLL" in line 11 of the abstract is suggested to be changed to "Delay Locked Loop (DLL)"

Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities:

a) In page 1 line 13 the recitation "CDMA" is suggested to be changed to "Code Division Multiple Access (CDMA)".

Application/Control Number: 10/033,513 Page 4

Art Unit: 2631

b) In page 2 line 7 the recitation "DSP" is suggested to be changed to "Digital Signal Processor (DSP)".

c) In page 4 line 15 the recitation "I/O" is suggested to be changed to "Input/Output (I/O)".

d) In page 9 line 19 the recitation "ASIC" is suggested to be changed to "Application-Specific Integrated Circuit (ASIC)".

Appropriate correction is required.

Claim Objections

Claim 3 objected to because of the following informalities: in line 2 of claim 3 the recitation "ASIC" is indefinite; it is suggested to be changed to "Application-Specific Integrated Circuit (ASIC)". Appropriate correction is required.

Allowable Subject Matter

Claims 1-19 are allowed over prior art (if the above objections are overcome).

The following is an examiner's statement of reasons for allowance: claims 1-19 are allowed because the references cited fail to teach, as applicant has, a second non-ontime symbol samples based on the first non-ontime control symbol samples and the ontime control symbol samples, as the applicant has claimed.

Conclusion

This application is in condition for allowance except for the following formal matters:

See above.

Art Unit: 2631

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. El-Tarhuni (US 6201828) discloses a spread-spectrum radio communication system in which transmissions occur with varying amounts of delay and in which the delay of a received signal must be determined in order to despread the signal, a system for refining the initial estimate of delay and for tracking the delay during an ongoing communication by correlating the signal at the estimated delay, an increment earlier than the estimated delay, and the same increment later than the estimated delay, and interpolating the early and late correlations normalized by the correlation at the estimated delay and by the increment to determine a refined estimate of the delay. Baltersee (US Patent Publication 20020037028) discloses a method and a rake receiver for code-tracking in communication systems in general and in code division multiple access (CDMA) communication systems being subject to multipath fading. Ali (US Patent Publication 20020080862) discloses a Rake receiver suitable for receiving, for example, direct sequence CDMA signals, in which the pilot code used to correlate the received signal in each Rake finger is interpolated prior to the correlation.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Juan A. Torres whose telephone number is (571) 272-3119. The examiner can normally be reached on Monday-Friday 9:00 AM - 5:00 PM.

Application/Control Number: 10/033,513 Page 6

Art Unit: 2631

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mohammad H. Ghayour can be reached on (571) 272-3021. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
